

NAO-2008-00212-kab

Selected Water

Folder NAO-2008-00212-kab
Form JD1
Name 2008-212 PFO Wetlands
Local Waterway Bethel Reservoir

Determination

Type Wetlands directly abutting RPWs that flow directly or indirectly into TNWs
Area 4046.856
Flow Ephemeral flow.
Flow Rationale Seasonally saturated wetlands

Physical Characteristics

General Wetland Characteristics

Properties

Wetland Size 1
Wetland Type PFO seasonally saturated wetlands
Wetland Quality just fringe wetlands surrounded by housing
Project wetlands cross or serve as state boundaries

Flow

Flow Type: Intermittent flow.
Surface flow Discrete and confined

Characteristics:

Subsurface Flow Unknown

Explain Findings

☐ Dye (or other) test performed**Wetland Adjacency Determination with Non-TNW**

- ☒ Directly abutting
☐ Not directly abutting
☐ Discrete wetland hydrologic connection

☐ Ecological connection☐ Separated by berm/barrier**Proximity (Relationship) to TNW**

Distance to the project waters from the TNW:

River miles: 2
Aerial miles: 1(straight miles)
Flow Direction Wetland to navigable waters

Estimate approximate location of wetland as within the [] floodplain.

Chemical Characteristics

Characterize tributary (e.g., water color is clear, discolored, oily film; water quality; general watershed characteristics, etc.).
no visual indications of pollution

Identify specific pollutants, if known

VOCs (gas, oil), pet wastes, ag wastes, air pollutants (sulfates and nitrites).

Biological Characteristics

Channel/Wetland supports (check all that apply):

☒ Riparian corridor

Type/Width: forested, small

☐ Vegetation type/percent cover

☒ Habitat for

☐ Federally Listed species

☐ Fish/spawn areas

☐ Other environmentally-sensitive species

☒ Aquatic/wildlife diversity

Explain findings:
